This book should be returned to the library on or before the date last stamped below.

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. A vertical line runs down the right side of the page, creating a margin. The paper appears to be from a notebook or a standard writing pad. There are no markings, text, or drawings on the page.

ON THE
FOREST ADMINISTRATION
OF THE
MARWAR STATE

For the years 1925-26 to 1928-29.

The Forest Department is supposed to submit an annual report, but as several years' reports were over-due, a joint report for the 4 years 1925-26 to 1928-29 has been prepared under my instructions. I am not acquainted with the working of the Department during this period, nor is the present Forest Superintendent. I hope that in future the annual Report of the Department will be submitted within 6 months of the close of the financial year, if not earlier.

Famine, frost, and locusts affected the operations of almost the entire period under report. The year of Famine 1925-26 saw considerable activity in the exploitation of forest produce owing to cheapness of labour and extensive facilities allowed for grazing, while the year 1927-28 was marked by special activity in the exploitation of the Anwal bark.

The settlement of Jagir Forests in Jaswantpura Range has made satisfactory progress, but the management of these forests costs more to the State than the commission received from Jagirdars. This state of things cannot be allowed to last long and it is hoped that some remedy will be found at an early date.

Fair progress was made with Forest demarcation by the erection of masonry pillars.

The Parbatsar Range was surveyed during the period and maps of some blocks were printed.

The Forest area exploited annually through contractors yielded an average revenue of Rs. 6/2 per acre—a fair return.

The various roads and buildings were kept in good repair at a moderate cost.

There has been a progressive increase in the number of Forest Offences and in the amount of compensation realised from offenders. The report does not give any reasons for this. I presume, this result is due to improved supervision.

The principal Forest products are timber, firewood and charcoal, while grazing brings in a substantial revenue. The financial results of exploitation of these by departmental agency and through contractors and right-holders are shown in Sec. V B. (a) and (b) of report and I need not repeat the figures. About Rs. 21,000/- worth of forest produce was in stock in the various depots at the end of the period under report. The provisional abolition of the Customs duty on timber and firewood during the current year should assist in improved sales in future.

The receipts from Anwal have fluctuated violently from Rs. 10,000/- to Rs. 25,000/- per annum. The variations are due chiefly to improvement or shrinkage in the foreign demand, though they seem to a certain extent to be due also to varying facilities for the exploitation of the shrub in the Jagir area. Future reports should show the quantity of the Anwal exploited from year to year.

(b)

The highest revenue was recorded in the year 1927-28. This was due to large demand for Anwal. The revenue of 1925-26 was also above normal account of famine conditions which enabled departmental operations to be taken on a large scale at a cheap cost. The normal income of the department is the neighbourhood of a lakh of rupees, and the normal expenditure varies from Rs. 67,000/- to Rs. 70,000/-.

Arboriculture constitutes one of the important activities of the The annual expenditure averages about Rs. 14,000/- and the annual revenue at Rs. 500/-. The department has no definite programme in hand for future Arboricultural operation. A five years' programme should be prepared and submitted for sanction. From what I have seen of Arboriculture work round the City Jodhpur, I imagine the cost of the operations can be reduced.

The report is a mere outline but sets forth the main facts clearly enough and my thanks are due to Mr. Kothari for having pushed through it.

HIMMAT SINGH, M. A.,
Revenue Member, State Council,
Raj Marwar, Jodhpur.

PROGRESS REPORT

ON THE FOREST ADMINISTRATION

OF THE MARWAR STATE

for the years 1925-26 to 1928-29.

INTRODUCTION.

The years under report, as usual, presented abnormal conditions owing to the inclemencies of weather during the period under report in general, and the visitation of locusts in the year 1928-29, in particular. The year 1925-26 was declared a famine year, and Famine Relief Measures were started and Depots for supply of grass at reduced rates were opened in different parts of the State, and graziers were allowed to take their cattle to the forests on concession rates. As a result of this, the incidence of grazing in the forest was very heavy. The cultivators were forced to eke out their scanty livelihood by resorting to exploitation of forest produce, and this resulted in a plentiful supply of labour for extraction of forest produce, and the result was that the Revenue figure in the year 1925-26 reached the high figure of Rs. 1,13,830/-. The years 1926-27 and 1928-29 were marked by an immense damage done to the forest growth by a heavy frost. The frost in the year 1928-29 was very severe, and its effect was visible even on forest hardy species. Whatever little vegetation escaped the ravages of frost or recuperated in the next spring season was much devastated by the locusts.

During the period to which the report relates, the writer of the report was not connected with the Forest Administration of Marwar, so he has very few personal observations to make on the various points mentioned in the body of the Report. The Report is based chiefly on the information supplied by the various range officers. It is admitted that in some places the information given is not very elaborate, but at the same time it is contended that it was not thought proper to postpone the submission of the report for want of certain details, the incorporation of which, in the body of the report would not have been of very great use at this time when the report has been long overdue.

J O D H P U R ,

Dated 15th May, 1931.

S. C. KOTHARI, B.A., P.F.S.,

Superintendent of Forests,

Raj Marwar,

CHAPTER I.

CONSTITUTION OF FORESTS.

SECTION I.

Alteration in Area.

No change in the area of Reserve Forests took place, the area under unclassified forests, however, slightly varied owing to re-calculation; and by the end of the period under report, they stood as detailed below:—

I. RESERVE FOREST:—

A. Khalsa .. 289.93 Sq. Miles	..	} 404.06 Sq Miles.
B. Jagir .. 114.13 „ „	..	

II. UNCLASSIFIED FORESTS:—

A. Khalsa .. 30.37 „ „	..	} 49.67 „ „
B. Jagir .. 19.30 „ „	..	

SECTION II.

Forest Settlement.

The settlement of Jagir Forests in Jaswantpura Range is making progress slowly, though none the less steadily. By the close of the year 1928-29, settlement of all the Jagir Forests except that of Puran Jagir, was finished.

As a result of the recent Revenue Settlement, the management of 4 of the Grassia villages in Bali Pargana was transferred from the Hawala to the Forest Department under Mehkma Khas Order No. 793 dated 11th July, 1928.

SECTION III.

Forest Demarcation.

The existing boundary pillars were repaired and annually white-washed and maintained in good order.

In the year 1925-26, 80 stone-posts as boundary marks were erected in Jodhpur Range at a total cost of Rs. 333/-; and 192 pucca pillars were made in the year 1927-28.

SECTION IV.

Survey.

The Prismatic Compass Survey of all the Forests of Parbatsar Range was done in the year 1925-26 and the interior details were plotted on the enlarged G. T. Maps. The maps of Sela and Siwana blocks and also those of Parbatsar Range were printed at Government of India Map Publication Office, Calcutta. No other new survey works were undertaken.

CHAPTER II.

MANAGEMENT OF STATE FORESTS.

SECTION I.

Regulation of Management.

The annual Plan of Operations for each Range was drawn up and operated in conformity with the Plans, so far as funds permitted it.

The following table shows the area of Forests exploited each year through contractors and the prices realized:—

Year.		Area in Acres.	Price realized.	Remarks.
1925-26	..	1,687	11,020 0 0	
1926-27	..	975	5,456 0 0	
1927-28	..	1,472	8,602 0 0	
1928-29	..	1,263	7,879 0 0	

SECTION II.

Communication and Building.

A. ROADS AND BRIDGES.

No new roads, bridle paths or bridges were constructed. The existing cart tracks were, however, repaired and their cost was as shown below:—

Year.			Amount.
1925-26.	Rs. 537
1926-27.	" 417
1927-28.	" 775
1928-29.	" 515

B. BUILDINGS.

No new pucca masonry works were undertaken. The old existing buildings were repaired and a few katcha Chowkies for Forest Guards and Head Guards were constructed. The expenditure under this head is detailed below:—

Year.			Amount.
1925-26	Rs. 1,598
1926-27.	" 1,413
1927-28.	" 1,332
1928-29.	" 1,307

SECTION III.

Protection of Forests.

(a) GENERAL PROTECTION.

The following table gives the number of cases of Forest Offences detected, and the compensation realized from the offenders:—

Year.		No. of offences.	Compensation realized.
1925-26.	..	269	1,074 3 3
1926-27.	..	305	1,294 15 0
1927-28.	..	335	1,867 6 6
1928-29.	..	446	2,483 14 0
Total	..	1,355	6,720 6 9

The above table shows a progressive increase in the number of offences and also in the amount of the compensation realized from the offenders.

During the period under report, there were 14 cases of injury to Forest by fire. The following table shows area burnt each year, and the cost of fire patrols maintained for protection of Forests against fire during the dry season:—

Y e a r .	Area burnt in Acres.	Cost.
1925-26. " "	1,260.5	369 15 0
1926-27. " "	0.5	432 8 9
1927-28. " "	532.5	595 1 0
1928-29. " "	226.5	633 12 0

The increase in the cost is due to an increased number of fire-patrols employed for the work.

The period under report on the whole was marked by scarcity of fodder, and the incidence of grazing was very high.

The following table gives an idea of the cases of illicit grazing:—

Y e a r .	No. of cases of illicit grazing.
1925-26. " "	140
1926-27. " "	203
1927-28. " "	137
1928-29. " "	192

(6) *Protection against injuries from natural causes.*

The low rainfall in the year 1925-26 adversely effected the vegetation, and as a result of scarcity of fodder outside the Reserve Forest, a large number of cattle were admitted into the forest and considerable damage was done to the forest growth. In the year 1926-27, the visitation of heavy frost did enormous damage to the growing stock, but comparatively good results were, however, obtained in the year 1927-28, which presented normal conditions; but the locusts and frost did enormous damage in the following year, i. e., 1928-29.

SECTION IV.

Sylviculture.

(a) NATURAL REPRODUCTION.

The period under report, as pointed out, was marked by unfavourable climatic conditions, and as a consequence, the results of natural reproduction were far from satisfactory, except in the cases of hardy species like Prosopis, Anwal, Kumath, Babul, Bor. Khair, etc.

(b) ARTIFICIAL REPRODUCTION.

Plants were artificially raised in forest nurseries and were as usual distributed free to cultivators; attempts were made to plant them out in the Forests, but these operations seem to have met with very little success, except in irrigated or moist places like Mataji, Chitrori, Bamania-Bera, Nagar, etc., because the plants could not get established for want of sufficient moisture in the soil and subsoil, in the months following the rainy season.

SECTION V.

Exploitation.

A.—SYSTEM OF MANAGEMENT.

Annual coupes for extraction of fuel and charcoal are worked on a system of coppice with standards, on 40 years rotation. Pettytimber for Agriculture implements and household construction purposes is removed from the Forests under a system that approximates the selection Felling System.

B.—AGENCY OF EXPLOITATION.

(a) *Departmental Agency.*

The following tabular statement shows the financial results of the exploitation of Forest produce by the Departmental Agency of working:—

Year.	TIMBER.		FIREWOOD AND CHARCOAL.		BAMBOOS.		GRASS.	
	Revenue.	Expenditure.	Revenue.	Expenditure.	Revenue.	Expenditure.	Revenue.	Expenditure.
1925-26 ..	2069	627	23140	26800	24	23	5457	266
1926-27 ..	3303	1070	32457	8971	568	317	343	15
1927-28 ..	2508	1842	27014	14954	528	306	188	203
1928-29 ..	4781	1101	19886	16419	523	345	194	373

The year 1925-26 being a famine year, labour was plentifully available for extraction of firewood and charcoal from the Forests; and these operations were in full swing that year. This factor accounts for heavy expenditure under "Firewood and Charcoal" in 1925-26 which was compensated by corresponding heavy increase of revenue and surplus in subsequent years against a decrease of expenditure. The grass which had been stacked during the preceding good years, was disposed of in 1925-26, a year of fodder scarcity and in consequence thereof the revenue under Grass came to Rs. 5,467. During the succeeding years, the work of Departmental collection of firewood and charcoal, *etc.* were not carried on very briskly as the foreign markets of Ajmer, Beawar and Ahmedabad were overflowed with the firewood and charcoal from the Forest of Ajmer, Jaipur, *etc.* Forests, and our produce could not stand in competition as a result of heavy Customs duty imposed on firewood.

Rs. 21,270 worth of forest produce remained in stock in various depots at the end of 1928-29.

(b) *Purchasers and Right-holders Agency.*

The coupes are leased out to contractors who usually manufacture charcoal, and sometimes also extract firewood from there. But the demand for charcoal is limited while extraction of firewood is prohibited by heavy Customs duty on export. The other purchasers extract forest produce on payment of fixed royalty on permit system. The right-holders also remove forest produce from the Forest free or on reduced rates, as the case may be.

The following statements shows the revenue from this Agency during the period under report:—

Year.	Timber.	Firewood and charcoal.	Grass and grazing.	Bamboos.	Other minor produce.
1925—26	14,816	13,628	22,420	1,891	6,440
1926—27	11,345	9,759	18,774	3,197	4,918
1927—28	13,736	15,168	20,204	2,691	6,913
1928—29	15,007	11,845	22,274	3,330	6,203

Timber, firewood, grass, *etc.*, on an average worth about Rs. 15,000/- are removed annually, free of royalty, by right-holders, from the Forests, and this figure is not included in the above table. There are slight variations in the Revenue returns from year to year, excepting that in the years 1925-26 and 1928-29 owing to famine conditions, the Grassias, Bhils, Minas and Rawats, *etc.*, resorted to earning their livelihood by exploitation of Forest produce; and this resulted in a little increase in revenue under timber. There was also fodder scarcity in these years outside the Reserve Forests, and a greater number of cattle of non-rightholders were admitted into the Forests and better returns under grass and grazing are due to it.

(c) *Free Grants.*

No free grants were made excepting those, as mentioned above to rightholders.

(d) *Other Sources of Forest Produce.*

Anwal (*Cassia Auriculata*) bark is the only other chief source of revenue to the Forest Department. The realizations under this head are as given below:—

Y e a r .		A m' o u n t .	
1925—26	15,983.
1926—27	10,257.
1927—28	25,320.
1928—29	13,603.

Reasons for variations are:—

In 1926-27, the decrease is due to forest damages and interference and destruction of Anwal by Jagirdars and Cultivators. The increase in 1927-28 is due both to recovery of accumulated arrears of contract money as well as large export of Anwal outside Marwar. The decrease in 1928-29 was due to the general trade depression.

CHAPTER III.

Financial Results.

The financial results are embodied in the table given below:—

Particulars.				1925-26	1926-27	1927-28	1928-29
Revenue	1,13,836	99,168	1,21,272	1,03,060
Expenditure	79,877	67,247	71,738	72,843
Surplus	33,959	31,921	49,534	30,217

As a result of famine conditions prevailing in the year 1925-26, plentiful labour was available for the working of the Forests on a big scale, and this accounts for comparatively heavy expenditure in that year. In the years 1926-27 and 1928-29, there is a marked decrease both in revenue and expenditure, the former is due to the fact that as a result of cheaper fuel supply from Jaipur and Kishengarh and Merwara Forests, our fuel could not find a sale in the markets of Ajmer, Beawar and Ahmedabad, *etc.*, and the decrease in the latter is due to restricted departmental operations for exploitation of fuel for which no congenial market could be found. The better result of 1927-28 are due to Anwal yielding better revenue as explained above.

Administration.

Babu Chatur Bhuj remained incharge of the Department, during the period under report. His Assistant Pt. S. A. Rikhesar, D. D. R. was retired under age limit in 1927. He was succeeded by B. Ramdayal, who worked as an Assistant Superintendent for 2 years.

With the separation of the Mines and Industries Departments from the Forests, the post of Assistant Superintendent was abolished.

B. Khem Raj, Forest Ranger, Bali, was dismissed on 16-12-24. He was, however, reinstated on 4-5-27 when the post of Range Officer fell vacant, on the resignation of the writer of this report. This post again fell vacant on 23-1-28, when B. Khemraj expired, and the vacancy thus caused was filled up by the grade increments to the other subordinates.

B. Achleshwar Ranger was reduced to the post of Deputy Ranger for two years from 1-4-28.

Forester Jawarmal, who was incharge of Parbatsar Range, was reduced and made Head-guard, from 1-1-25 and Head Guard Birdhraj was made Forester in his place and posted incharge of Parbatsar Range.

One candidate, Bejairup was deputed for Forest training at State expense to Balaghat in October 1928.

It is not possible to give any reliably accurate figures of the plants that (1) have been raised (2) required watering and (3) passed out of watering stage from year to year. These figures would not only be interesting but also help one in knowing the approximate cost per tree for its tending and maintenance. Attempts will be made to give fuller information under this head in future.

(d) Marwar Timber Factory.

This factory was run by Mistry Ramratan as a private concern, under the expert supervision of the Forest Department, for encouragement of the use of indigenous timber. The working was carried on satisfactorily. He purchased Forest timber as below:—

1925—26	1926—27	1927—28	1928—29
89 5 0	209 0 0	169 12 3	166 11 0

(e) Cattle Pounds.

18 Cattle Pounds remained incharge of the Department at the time of the close of the period to which this report relates. The revenue from these pounds as well as the expenditure on the maintenance of these pounds are credited and debited to the Hawala Department. The Range Officers in whose territorial charge, the pound lies, is responsible for the running of the pound and the monthly returns and accounts are sent to Hawala Department.

Mining Department.

The control of this Department, which has now been found into an independent Department under a separate charge Officer, was taken away from the Forest Department with effect from 1-10-1929 after 7 years.

Industries Department.

This Department was also separated from the Forest along with the Mining Department with which it has been amalgamated.

S. C. KOTHARI,
Superintendent of Forests,
Raj Marwar.

June 16, 1931.

APPENDICES.
